Casey stated they did an algae treatment last week. Not allowed to use cooper sulfate so they had to use a Chelated copper and could treat a portion of the treatment area due to EGLE new regulations. Casey hasn't been able to look at the lake. Carolyn stated that the lake looks really good right now. It got cooler and that help, and Casey was able to use Phoslock. This treats all the phosphorus in the lake and create a barrier on the bottom. If any phosphorus gets release from the settlement from the bottom it gets lock up and can't be used. We did that over by the inlet channel, little bay circle area. Terry asked if there has been much algae and Casey said there was algae and treated and now it gone. They used Procellacor to treat Milfoil last year and not much has come back. Treatment cost should be less. Casey said they would be back in a couple of weeks. Craig asked how much was the Phoslock treatment? Casey state just over \$2,000.00. We will wait to see what the lake looks like before another Phoslock treatment

Motion to pay bills as they come in by Craig Mills. Second by Terry Walters. All in favor m/c
